RESIDENT RETENTION · PROPERTY MANAGEMENT

The best products here will talk to your residents about renewing.

Mine is banned from mentioning the renewal.

This category is not ~~empty~~ and not ~~lazy~~. It is well funded and it works.

Nobody needs to be told renewals matter.

EliseAI: proactive check-ins, lease term answers, guiding a resident through renewing.

Colleen AI: engaging ahead of the 90-day timeline.

One open question, 90 days out. Rent, lease terms, deadlines and money: blocked.

Whatever comes back goes to a person.

One is built to close a renewal. The other is built to find out what is broken while there is still time to fix it.

BUY THEIRS IF THIS IS YOU

You want renewals closed by software that talks to residents. You have the volume to justify it.

Then buy the renewal assistant. They are

good.

CHECK WHAT YOU ALREADY PAY FOR

Renewal workflow usually ships inside your PMS.

Typically $1 to $2 per unit per month.

If the problem is offers going out late, start there.

SURVEYS ARE A DIFFERENT INSTRUMENT

SatisFacts and J Turner measure. They do not intervene, and they are not competing with either.

Most operators should have one.

Work out which of these you are a customer of.

Before you talk to anyone, including me.
